

SOCIAL MEDIA VIRTUAL ASSISTANT SERVICES

5 BENEFITS FOR YOUR BUSINESS

SOCIAL MEDIA STRATEGY

A social media VA helps to evaluate the business' social media strategy. I.e., to refocus & re-prioritize where the business should move forward. The strategy defines the brand's goals & helps focus the social media VA's priorities & activities.

SOCIAL MEDIA CHANNEL

The social media VA prepares the business channels according to the social media marketing plan. The time for talking is at end & it's time to begin implementing the "Plan". The basic steps are: setup channels, research channel content & manage the content calendar.

SOCIAL MEDIA PUBLICATION

The social media VA is the key to creating content to feed the appetite of the business social media channels. Creating content starts with an idea. Then it is complemented with visuals. Add the Internet research. Finetune the copy & schedule the social media posts. This pays the bills.

WEBSITE BLOG PUBLICATION

A business website blog is different from its social media channels. The social media VA can support both. It depends on priorities, resources & skill sets. A website blog does not have competition. The readership is more dedicated. The content is different & of higher quality.

SOCIAL MEDIA EVALUATION

Does the social media investment achieve the goals & results desired? The social media VA provides business management the data and analysis to reach an answer. It starts with the social media data & analytical tools to interpret the data to understand the audience behavior.
